Roof Print Packages

Roof Print Packages

Although we have the ability to print any panel by itself, or anywhere on the marquee, we have found in our experience that most people ask for one of the below printing combinations. As such, we have now started to price our roof printing around these different printing combinations, and bundled them into packages.

At Attention

Four Valance

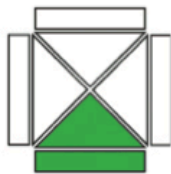

Brand Booster

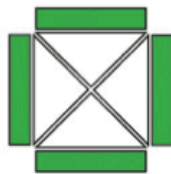

Max Impact

- Custom background color

Our most popular packages. Great value for money.

Includes

- 4 x Canopy Panel
- 4 x Valance
- Custom background color

For those that want to get the most impact from their printed marquee.

Sidewall Printing Options

Further to printing the tops of the marquees, you are also able to brand the sidewalls. The sidewalls have the option to brand either on the inside or outside. In fact, you can even brand both side if that's what you want.

Sidewalls

Details

- Inside or outside printing
- Can also be double sided

Suggested Use

Sidewalls are a useful printing area because they can be seen from a long distance, if printed on the outside, or can display product service information if printed on the inside.

Half Walls

Details

- Inside or outside printing
- Can also be double sided

Suggested Use

A half wall can be used on any side of the marquee. It will prevent people from seeing under tables etc. Generally we suggest you put similar information to valances, but with the extra space, fill it with images and photos
